Dipstick Strep A Quiz

Circle the correct answer

This quiz is an educational tool intended to assist facilities in evaluating their operators' understanding of the QuickVue Dipstick Strep A Test procedure. This quiz is not intended to be used as sole evidence of operator training or competency. Facilities are responsible for ensuring the quality of the testing performed by their operators. When testing controls or patient specimens, follow the current Package Insert instructions and/or Procedure Card included in the kit.

1.	w often does the manufacturer recommend that external controls be run on the kit?			
	a) Once every 20 tests	d)	Once per each untrained operator, once for	
	b) Once per each new shipment of kits		each new shipment of kits - provided that each	
	c) Every first sample tested each day		different lot in a shipment is tested	
2.	At what temperature do the kits need to be stored?			
	a) 2°C to 8°C (refrigerated)	c)	2°C to 30°C (refrigerated or room temperature	
	b) 15°C to 30°C (room temperature)	d)	–20°C (frozen)	
3.	For proper test performance, which swab should be u	use	d when collecting a throat swab specimen?*	
	a) The swabs provided in the kit	c)	Any Dacron® swabs	
	b) Any type of throat swabs		Cotton-tipped swabs	
4.	What is the read time for this kit?			
	a) 5 minutes	c)	10 minutes	
	b) 6 minutes		20 minutes	
			20 militates	
5.	Can the test be read after the read time?	,	V	
	a) No		Yes, up to 5 minutes after the read time	
	b) Yes, up to 10 minutes after the read time	d)	Yes, any time after the read time	
6.	How long after adding Reagent A and B together in the tube is it still good?			
	a) 8 hours	c)	Immediately after adding both reagents	
	b) 48 hours	d)	24 hours	
7.	What color should the solution be when Reagents A and B are mixed?			
	a) Clear		Dark green	
	b) Any shade of green	d)	Yellow	
8.	What is the incubation time when the swab sample	e is	in the Reagent A and B mixture?	
	a) 5 minutes		1 minute	
	b) There isn't an incubation time		2 minutes	
			2 111114163	
9.	The throat swab specimen is good for how long in an processing?	y c	lean, dry, plastic tube or sleeve before	
	a) 24 hours	(ر)	48 hours	
	b) 8 hours		72 hours	
	b) o nouis	u)	72 Hours	
10	.If culture is desired after throat swab is collected, wh			
	a) Lightly streak the swab on a 5% sheep blood agar	c)	Culture is not necessary	
	plate before using swab in the QuickVue Dipstick			
	Strep A Test or obtain dual throat swab specimens
