

Revolutionizing the way TPN Management is Done.

The PINNACLE® TPN Management System is unlike any compounder available today. That's because it's more than just a device; it's a system, one that streamlines all functional areas of operation and manages all aspects of the TPN process for improved efficiency and safety.

So, Go Ahead!

Improve the Efficiency and Safety of Your Compounding Operation with the PINNACLE® TPN Management System.

PINNACLE® TPN Management System.

Advanced automation for fast, smart, user-friendly compounding.

Fast and Efficient.

- Reduces transcription errors and expedites patient care through direct electronic communication from physician to pharmacist
- Reduces set-up time – less than 15 minutes
- Reduces time required for TPN preparation—1 liter in less than 1 minute
- Decreases risk of touch contamination with pre-assembled dispensing sets

Smart and Accurate.

- Helps reduce medication errors by using barcode verification and barcoded patient prescriptions
- Helps enhance compliance with USP <797>, A.S.P.E.N. and ASHP guidelines
- Implements automatic quality assurance checks throughout the TPN process
- Standardizes and streamlines compounding operations by connecting multiple facilities
- Provides access to Trissel's™ Ca/P Check Safety Software for informed decisions on solution compatibility

User Friendly.

- Windows®-based user format with easy touch-screen and pull-down menus
- Minimizes down time—real-time help assists in identifying errors and resolving them quickly
- Easy-to-follow tutorial
- Flexibility for single-, multiple-, and network-user access and Internet capability

Increase Efficiency and Reduce Medication Errors from Order Entry to Mixing to Delivery.

When you combine the PINNACLE® TPN Management System with the Outlook® Safety Infusion System from B. Braun, you have a complete, integrated TPN system that provides a high level of efficiency, accuracy, and safety – from order entry to compounding to infusion, from physician to pharmacist to patient. Features barcode verification at multiple points in mixing and delivery process.

Order Entry
The TPN Manager Windows® browser-based system provides easy-to-use advanced CPOE (Computerized Physician Order Entry) and Pharmacy Check Software.

Prescription Verification
Scanning the barcode of the patient's prescription is fast and easy. Automation helps reduce manual programming errors.

The PINNACLE® TPN Management System Helps:

- Reduce the incidence of drug incompatibilities
- Reduce the risk of manual programming errors
- Eliminate transcription errors
- Expedite patient care
- Increase patient safety through decreased medication errors

The Outlook® Safety Infusion System with Patented DoseScan™ Technology Helps:

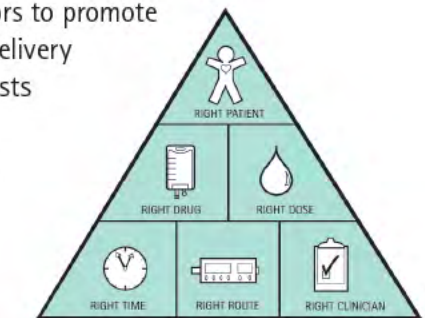

- Reduce IV medication errors using pump-based barcoding
- Ensure the right patient receives the right drug at the right dose by an authorized clinician at the point-of-care.

Barcode-driven Admixture
By scanning the barcoded set and solution NDC numbers, the PINNACLE TPN Management System confirms that the correct solution is on the correct line.

The Benefits of Combining These Systems:

- An improvement in your institution's overall safety program in compliance with USP <797> Guidelines
- The ability to proactively address regulations requiring barcoding of IV medications
- The ability to help reduce compounding and prescription errors to promote safe IV medication delivery
- Reduction in high costs associated with medication errors

PROMOTE SAFE IV MEDICATION DELIVERY

Bedside Confirmation
The Outlook Safety Infusion System matches the right medication with the right patient and helps reduce manual programming errors.
