

Cardinal Health™ OR Accessories

Essential OR products
when you need them

Preparedness and reliability are critical in the OR.

Cardinal Health™ offers a full range of the accessory products used in most surgical procedures. Our products allow operating rooms to run smoothly, ensuring the products needed most are readily available and accessible. Clinicians can focus on their patients and the task at hand, knowing the products they need to provide safe care are within reach.

Our extensive portfolio includes products such as laparotomy sponges, OR towels, needle counters, skin markers, light handle covers and many others and is divided into the following groups:

OR Sponges and Towels

Reduce cleanup and protect patient health with sponges and towels that are soft, absorbent and X-ray detectable.

OR Safety

Ensure adherence to clinician and patient safety standards and recommendations with magnetic drapes, needle counters, sponge counting systems and other safety products.

OR Essentials

Access the products you need and use before, during and after surgery, including electro-surgical cautery supplies, light handle covers, marking pens, vessel loops and more.

Products are available single sterile for individual orders and bulk nonsterile for inclusion in prearranged standard and custom packs.

Every experience in the OR is unique, and being prepared is crucial to providing positive patient outcomes. Rely on Cardinal Health™ OR Accessories to deliver quality performance time and time again.

Light handle systems

The function of the light handle system is to extend the sterile field to the OR light allowing the clinician to adjust the light source throughout the procedure and then dispose of the sterile consumable. This avoids costly sterilization processing of the OR light handle between procedures. Light handle systems have two components: adaptive hardware and a sterile consumable.

Adaptive hardware

OR light hardware is installed directly to the overhead OR light and remains in place to allow for the use of sterile disposable products. The hardware ensures proper fit of the sterile disposable light handle products.

- **Universal light handle (ULH)** - replaces the existing light handle on the OR light with a Cardinal Health™ ULH, designed specifically to be used with Cardinal Health™ Flexible and Semi-Rigid Light Handle Covers.
- **Universal light adapter (ULA)** - replaces the existing light handle with a fixed socket to be used with Cardinal Health™ Rigid Light Handles.

Adaptive hardware is specific and customized to the OR light used in your facility. **Please contact your Cardinal Health sales representative** for details in identifying and ordering adaptive hardware.

5128-FG

Marking pens, continued

Utility marking pens

- For use on most surfaces, including nonwoven central sterilization (CSR) wrap, sterilization tape, plastic, glass or stainless steel
- Permanent black ink
- Nonsmearing, fast-drying and nontoxic
- Regular, fine or tapered tip styles available
 - Convex cone shape of tapered tip marking pens allows user to control and vary the width of markings
- Available with a flexible ruler and/or labels
- May be sterilized by steam or ethylene oxide (EO) gas
- Individually wrapped
- Not made with natural rubber latex
- Available single sterile and bulk nonsterile

Vessel loops

- Used to occlude, retract and identify vessels, veins, nerves and tendons during surgical procedures
- Made from medical-grade silicone; not made with natural rubber latex
- X-ray detectable/radiopaque
- Available in two diameter sizes – mini (0.8 mm) and maxi (1 mm), one length (16 in., or 406 mm), and four colors (blue, red, yellow, white)
- Two vessel loops per pack, wound and secured in a double-pouch configuration to prevent tangling, support sterile presentation and eliminate unnecessary accountable items
- Single use
- Available single sterile and bulk nonsterile
