

Chemotherapy protection that works as hard as you do

Protecting hospital staff at every step of care

Exposure risks exist in many areas of a healthcare facility, making it critical that staff have the right level of protection. Cardinal Health carries a comprehensive line of chemotherapy gowns and sleeves that protect healthcare personnel from exposure to bodily fluids and 16 types of chemotherapy drugs, from preparation and handling to administration and disposal.

Safety first

Cardinal Health™ ChemoPlus™ Chemotherapy Gowns and Sleeves provide comparable fluid protection to a surgical gown while also providing a barrier against toxic chemotherapy drugs.

The gown has been evaluated for **resistance to permeation of 16 chemotherapy drugs** per ASTM F739-20¹

AAMI Level 3 gowns and sleeves meet strict standards for moderate fluid protection

Meet **USP <800> standards** for handling hazardous drugs

FDA 510(k) clearance

Reinforced critical zones include chest, sleeve seam, sleeve and front belt attachment points where direct contact with infectious material is most likely to occur

This gown is classified as **Level 3** per **AAMI Standard PB70 Liquid barrier performance and classification of protective apparel and drapes** intended for use in healthcare facilities.

Sterile and non-sterile packaging options help allow for use in a wider range of healthcare settings

As cancer treatment evolves, so do the drug touch points in the hospital, from the sterile compounding done in the pharmacy to the different administration sites throughout the facility. Cardinal Health™ ChemoPlus™ Chemotherapy Gowns and Sleeves are some of the first infection control apparel to offer sterile packaging options for those that may require it in their facility.

- ChemoPlus™ poly-coated chemotherapy apparel in light blue
- Full back style gowns that close and tie in the back
- Open back gowns that provide front coverage and breathability
- Sleeve options

Steady supply chain

Cardinal Health™ Chemotherapy Gowns and Sleeves are manufactured in Cardinal Health-owned facilities from raw materials sourced in North America. This contributes to a strict quality control process and resilient supply chain.

Your hospital staff works hard to protect and treat patients. They deserve chemotherapy protection that works hard to protect them, too.

Contact your Cardinal Health sales representative to request product samples.

*FDA requires gowns with chemotherapy claims and moderate or high fluid level claims, which includes AAMI Level 3, to have 510(k) clearance.
