AAMI established standard ANSI/AAMI PB70:2022 for protective apparel, including surgical gowns, outlining the testing requirements for the four different AAMI levels. The FDA recognizes this standard for all surgical gown manufacturers.

## Dress for success

In the clinical setting, success equals safety. At their respective AAMI levels, surgical gowns protect your team from fluid exposure and blood-borne pathogens. Your safety comes first, and donning the right surgical gown at the right AAMI level is a critical first step.

### When selecting a gown, consider:

**1** How much exposure is expected?

**2** How long will the exposure last?

**3** What is my role in the procedure?

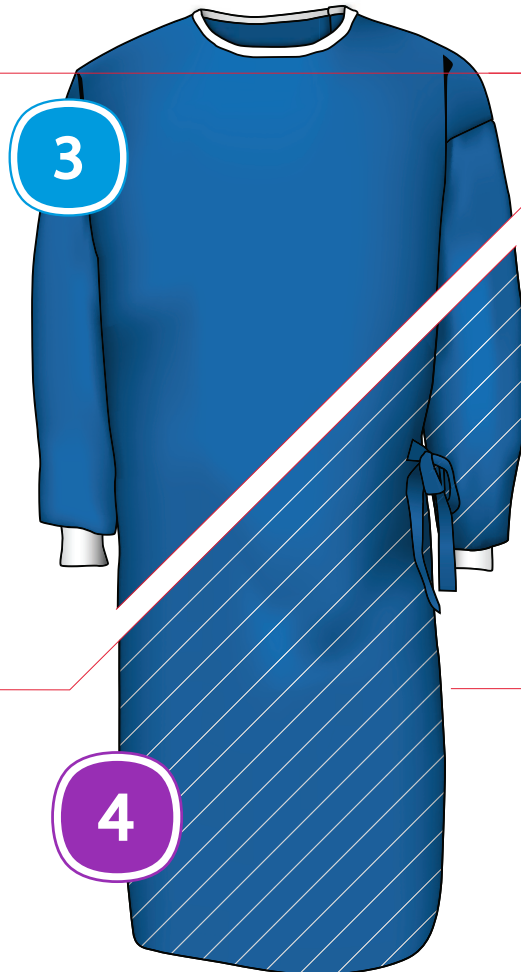

AAMI levels determined by ANSI/AAMI PB70:2022 — Suggested guidelines are not a substitute for clinician professional judgment and experience.

## AAMI Level 3

These surgical gowns have the ability to resist **moderate** fluid exposure

### Includes:

- Non-Reinforced
- Fabric Reinforced

### AAMI Level 3 procedures

- Mastectomies
- Arthroscopic orthopedic procedures
- Endoscopic urological procedures such as transurethral prostate resections (TURP)

## AAMI Level 4

These surgical gowns have the ability to resist **high** fluid exposure and blood-borne pathogens

### Includes:

- Breathable film
- Poly reinforced

### AAMI Level 4 procedures

- Any procedure in which the surgeon's hands and arms are in the body cavity
- Orthopedic procedures during which tourniquets are not used
- Open cardiovascular or thoracic procedures
- Trauma procedures
- Cesarean sections

 Indicates an integrated layer of film for added protection

## CoolSource™ Cooling System

# It's time to turn up staff satisfaction

With the CoolSource™ Cooling System, six cooling pack placement options targeted at heat zones lower core body temperatures and maximize cooling\* — especially during long and labor-intensive procedures. Plus, the vest is easy to put on and conforms to your body, providing a custom fit that moves comfortably with you.

### Key features:

#### CoolSource™ Cooling Vest

- Lightweight, disposable design
- Six pockets intentionally placed for cooling dispersion
- Nonsterile, worn underneath PPE
- Velcro® closures
- Belt for an adjustable fit
- Patented design

#### CoolSource™ Cooling Pack

- Lightweight, flexible design
- Six reusable cooling packs used per cooling vest
- Non-woven casing helps prevent condensation
- 2+ hour cooling duration\*
