## Gentle Stim Iontophoresis Electrode Treatment Kits

An innovative disposable iontophoretic drug delivery system, with a unique scientific blend of materials for optimum comfort during treatment. Each kit contains: one active drug delivery electrode, one buffered return electrode and two alcohol prep pads.

### Active Drug Delivery Electrode

Contains a reservoir pad to hold the deliverable solution. Reservoir pad fill area is conveniently accessible to allow for easy application of the solution prior to removal of the adhesive backing. The soft foam backing, with medical grade adhesive, is flexible and conforms to body contours.

### Buffered Return Electrode

The return electrode, with patented buffered gel, minimizes skin irritation.

Item #	Description	Bag
P850275	<b>Small Square Electrode Kit</b> Includes: Small Square (2 3/4" x 2 3/4") Active Drug Delivery Electrode (1.5-2.0cc fill volume), 1 buffer return electrode, and 2 sterile, medium alcohol prep pads	10
P850325	<b>Medium Square Electrode Kit</b> Medium Square (3 1/4" x 3 1/4") Active Drug Delivery Electrode (2.5-3.0cc fill volume), 1 buffer return electrode, and 2 sterile, medium alcohol prep pads	10
P850350	<b>Large Square Electrode Kit</b> Large Square (3 1/2" x 3 1/2") Active Drug Delivery Electrode (4.0-4.5cc fill volume), 1 buffer return electrode, and 2 sterile, medium alcohol prep pads	10
P850375	<b>Butterfly Electrode Kit</b> Includes: Butterfly (3 3/4" x 3.38") Active Drug Delivery Electrode (2.0-2.5cc fill volume), 1 buffer return electrode, and 2 sterile, medium alcohol prep pads	10
