EC Design-Examination Certificate
Directive 93/42/EEC on Medical Devices, Annex II, section 4

Design Approval no. 92630-2011-CE-USA-NA-D

Manufacturer name: Excelint International Co.		
Manufacturer address: 2500 Santa Fe Avenue Redondo Beach, CA 90278 - USA		
Type of medical device and identification no.: Anaesthesia (Epidural, Spinal) Needle	Class of Medical Device: III	GMDN code: 12729
Short description of the medical device: The device is EO sterilized and used to inject anaesthetics into spine or extract spinal fluid from the spine.		
This is to certify that the medical device fulfills the relevant requirements for Directive 93/42/EEC concerning medical devices.		
Limitations: Any changes in the Design shall immediately be reported to Det Norske Veritas Certification AS in order to examine whether this Certificate remains valid. Annual Periodical Audits will be held to verify the validity of this Certificate.		
The examined documents are filed under: PRJC-259023-2016-MSL-USA		
This certificate is valid until: 30 January 2019		
<i>for</i> DET NORSKE VERITAS CERTIFICATION AS	Hovik, 30 April 2014	
Aud Loken Eiklid Certification Manager	Jenny Helen Nytn Technical Reviewer	

This Certificate has been digitally signed. See www.dnv.com/verification for more info.

This Certificate is valid until the date specified. Any significant changes in the design or construction of the products, the quality system or amendments to the Directive may render this Certificate invalid at an earlier date. The product liability rests with the manufacturer or his representative in accordance with Council Directive 85/374/EEC.

HUBER NEEDLES

- This device does not contain natural rubber latex
 - NON-DEHP
 - Non Coring
 - 316L stainless steel construction
 - Available in both straight and 90 degree angles
 - Needle volume of +0.5 ml
- Polypropylene hubs, color-coded according to gauge for easy Identification

HUBER NEEDLES

(non-coring) right angle

Catalog No.	Description	Hub Color

SAFELET IV CATHETERS

This device does not contain natural rubber latex.

FEATURES

- Easy dispenser pack
- Functional design casing permitting one action opening and no rolling
- Color-coded cap allows for easier identification of catheter size
- Translucent catheter hub and flashback chamber allows for easy detection of blood flashback at vein insertion
- Radio-opaque striped catheter
- Precision finished FEP catheter assures stable flow and eliminates catheter tip kink during venipuncture
- Cannula with additional back bevel
- Can be connected to syringe by removing filter cap to expose Luer taper end
- Use of hydrophobic membrane filter eliminates blood leakage
- Close and smooth contact between catheter tip and inner needle enables safe and smooth venipuncture
- Crimped smooth engagement between catheter and hub, without use of adhesive, helps eliminate blood residuals and helps reduce blood coagulation or hemolysis

26504	21G x 1 ½"	Green
26505	22G x 1"	Black
26506	22G x 1 ½"	Black

100/box, 1000/case

- This product does not contain natural rubber latex.
- Sterile
- Non-toxic
- Multi-sample needles permit several samples to be taken with a single puncture
- Sharp & smooth edges make penetration painless for patients and provides easy connection to rubber stoppers

MULTI-SAMPLE LUER HOLDERS

Catalog No.	Description
26530	5-7.5ml holder

100/bag, 1000/case (Non-Sterile)

LUER LOCK HOLDER WITH PRE-ATTACHED MULTIPLE SAMPLE ADAPTER

Catalog No.	Description
26532	5-7.5ML HOLDER

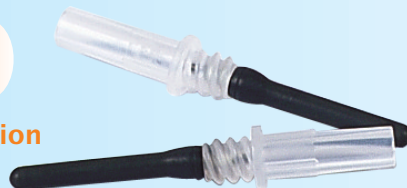

50/box,200/case
Available in bulk pack

- Features:**
- Does not contain natural rubber latex.
 - Sterile
 - Individually packed.
 - Luer Lock connection.
 - Blue color thread.

MULTI-SAMPLE LUER ADAPTERS

DENTAL NEEDLES PLASTIC HUB

Catalog No.	Description	Length	Hub Color
26555	30G Short	(21mm)	Blue
26562	30G Long	(32mm)	Blue
26557	27G Long	(32mm)	Yellow

100/box, 1,000/case

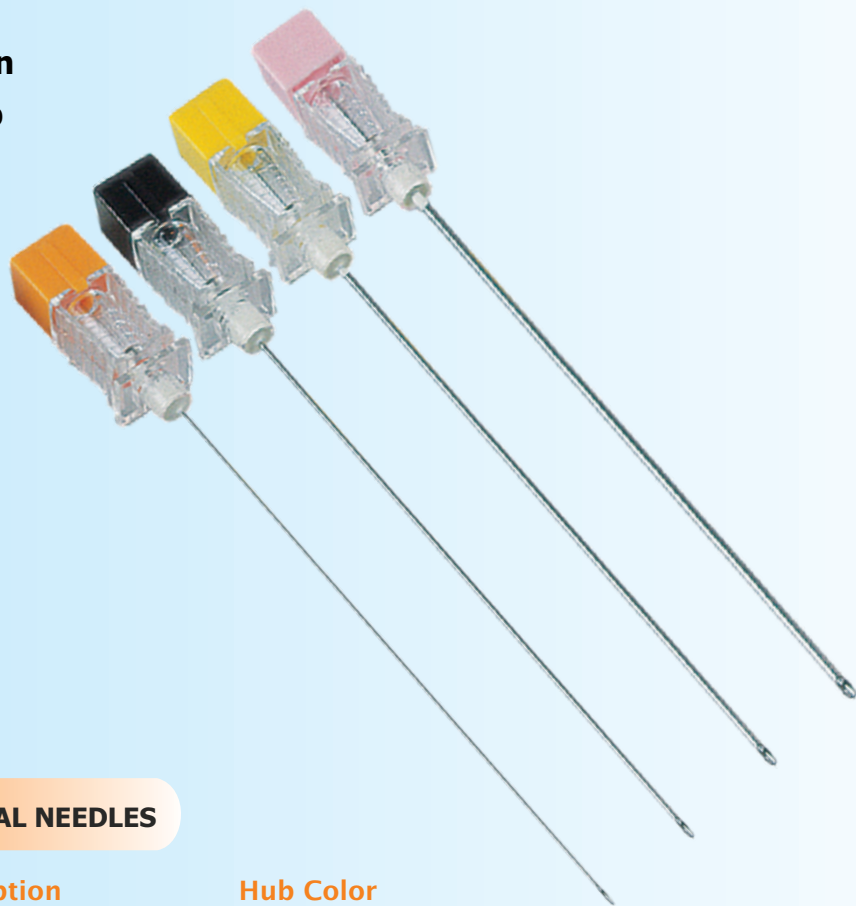

Convenient
RED DOT
marks the
bevel position

NEW
Hub design
for greater needle
flexibility

- New hub design lowers the chances of needle breakage by 500% !
- New RED DOT on the needle hub marks the needle bevel position, even when the needle point is not visible
- Years of exacting experience in the production of hypodermic needles has been applied to the production of Dental Needles, virtually painless, atraumatic, and perfectly sharp to give maximum patient comfort. Dental Needle production is computer controlled in all processes from manufacture to inspection. In addition, every needle passes an optical inspection
- The cannula is siliconized
- Needles are sterilized by Ethylene Oxide and their sterility is guaranteed by testing every production lot prior to release
- Dental Needle hubs and boxes are color coded by gauge for easier identification of suitable needle and gauge
- Each needle is individually packaged, sterilized, and ready for immediate use
- Self-tapping ribs placed on the outside of the hub, and inside threads make for ease of use
- Larger cannula lumen (.0055")

SPINAL NEEDLES

- This product does not contain natural rubber latex.
- Convenient blister packaging
- Siliconized for smooth comfortable penetration
- Transparent plastic hub

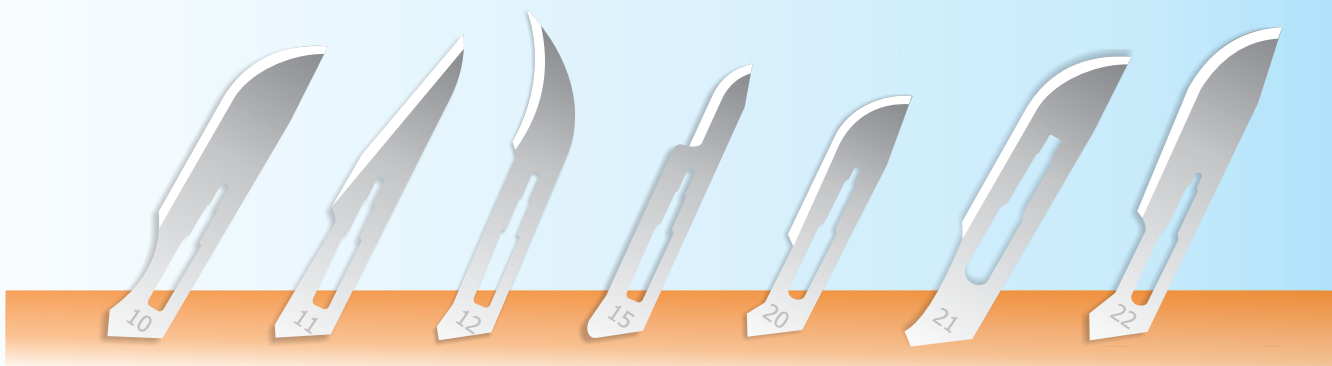

'QUINKE' BEVEL SPINAL NEEDLES

Catalog No.	Description	Hub Color
26960	18G (1.20mm) x 3 1/2"	Pink

SURGICAL BLADES DISPOSABLE SCALPELS

- This product does not contain natural rubber latex.
- Made from premium quality Swiss Carbon Steel and British Stainless Steel
- Computer controlled grinding, sharpening and polishing, ensures consistently smooth incision properties
- Sterilized by GAMMA Radiation 2.5m - RADS
- A Vapor Corrosion Inhibitor (VCI) paper lining, leakage testing, and an aluminum foil peel pack help insure quality and integrity when ready for use
- Each production lot is sampled and conforms to ISO 2859, inspection level (S4) AQL 1.0 & 2.5
- Blade rigidity is tested to eliminate blade breakage
- Blades conform to ISO: 7740 (1995) & BS: 2982 (1986)
- Blades are ultrasonically cleaned prior to packing

PRESSURE BANDAGES

ZorBand[®] PRESSURE BANDAGES

- **Sterile**
- **Safe**
- **Easy to use**
- **Increased efficiency**
- **Individually packaged**
- **More convenient than traditional dressings**
- **ZorBand reduces direct pressure time by over 40%**
- **Absorbent cellulose pad expands when contacted by blood**
- **Swelling action of pad creates a pressure compress**
- **Firmly applies pressure to puncture**
- **ZorBand tightly binds to patients' skin to guard from leakage and maintain pressure**
